

## **ReadMe addendum to Light and Water**

### **BACKGROUND**

This CD-ROM contains a PDF version of Curtis D. Mobley's book, "Light and Water, Radiative Transfer in Natural Waters," published in 1994.

The text from the original manuscript, along with original figure drawings, was used to recreate the book in electronic form. The resulting product was then converted to PDF (Portable Document Format) and appears on this CD-ROM.

Each chapter or section is in a separate file, with hyperlinks on the first and last pages to the previous or next chapter, respectively.

The Table of Contents contains direct hyperlinks to each chapter.

### **TO BEGIN**

Open the file **Start.pdf** from the CD root. From this representation of the front cover of the book, you can begin navigating the entire volume via the two yellow labeled hyperlinks:

- **Preface** - a hyperlink to a Preface created especially for this CD-ROM by the author.
- **Table of Contents** - the original 'Table of Contents' with blue labeled hyperlinks to each chapter and section.

### **SPECIAL FEATURES**

This volume has been tagged for electronic readers to assist the visually impaired.

The author has added errata data to the book. It can be accessed via blue labeled hyperlinks titled "See Note" or "see Supplementary Note". Selecting that button or text will open the errata file.

The text has been 'cataloged' (fully 'word' indexed). This function requires an "Adobe Acrobat with Search" reader, available from Adobe's *website*. The 'catalog' file is located at "[root]/INDEX/LightAndWater.pdx" and is 'attached' through the Acrobat Reader with Search (see below).

## **HOW TO SEARCH FOR TEXT**

### **A. in Adobe Acrobat 4.0/5.0:**

1. Open 'Acrobat Reader with Search' directly.
2. Select the toolbar search query button (small binoculars in front of a page) or, from the menu, select Tools > Search > Query.
3. Click the "Indexes..." button and "Add..." the "Light and Water" index, found in the LightAndWater.pdx file in the "\\SEARCH\\" sub-directory on this CD-ROM.
4. Enter search criteria in the search window, and select Search.

### **B. in Adobe Acrobat 6.0:**

1. Open 'Acrobat Reader with Search' directly.
2. Select the toolbar search query button (binoculars) or, from the menu, select "Edit > Search".
3. Select "Use Advanced Search Options"
4. Click the 'down arrow' in the ""Look In:" text box and select "Select Index..."
5. Select the 'Light and Water' index. If absent, "Add" the "Light and Water" index, found in the LightAndWater.pdx file in the "\\SEARCH\\" sub-directory on this CD-ROM.
6. Enter search criteria in the search window, and select Search.
